

QGIS Redmine (QGIS bug tracker) - Bug report #16556

Commit log reference to tickets do not result in ticket updates

2017-05-16 11:11 AM - Sandro Santilli

Status:	Closed	
Priority:	Normal	
Assignee:	Jürgen Fischer	
Category:	Any	
Pull Request or Patch supplied:	Not supplied	
Description		
Tickets are not updated to contain reference to commits which reference them. Superceeds #3944 (which cannot be edited due to #16555).		

History

#1 - 2017-05-16 11:19 AM - Jürgen Fischer

Which commits are not backreferenced?

#2 - 2017-05-16 05:51 PM - Sandro Santilli

Indeed I just saw a commit of mine correctly updating the ticket #15507-8

When I filed this one I was referring to this case instead:#15962-15

Alexander used `ref #xxx`, maybe that's the problem ?

#3 - 2017-05-16 06:18 PM - Jürgen Fischer

- Status changed from Open to Closed

Apparently. refs,references,IssueID,related to,fixes,closes,fix,implements signal references - ref doesn't.

#4 - 2017-05-16 06:19 PM - Sandro Santilli

I've now also used "See #xxx" which again did not work:

#15507-10

Can't these be made to work ? Weren't them working before ?

At least in Trac there's a configuration setting to determine what works and what not...

My previous comment lists what's configured to work. That's also what was configured before. AFAIK changing it now wouldn't help as it's evaluated when the commit happens (and github fires the trigger)
