

QGIS Redmine (QGIS bug tracker) - Bug report #16557

Default "Category" is blank, but cannot be

2017-05-16 11:13 AM - Sandro Santilli

Status:	Open	
Priority:	Normal	
Assignee:	Jürgen Fischer	
Category:	Any	
Pull Request or Patch supplied:		
Description		
<p>Filing tickets in this tracker requires picking a Category, but there's a single Category being "any" and it's not the default. The default category is blank, which is invalid.</p> <p>Please make "any" the default, if it has to stay, or allow blank Category...</p> <p>NOTE: I'm assigning to Jurgen because I've been told it's Jurgen and Richard who worked on the upgrade, but Richard is not in the pull-down menu for Assignee...</p>
