

QGIS Application - Feature request #16587

Native XYZ provider doesn't support local files

2017-05-20 12:03 AM - Olivier Dalang

Status:	Closed	Resolution: Copied to github as #: 24489
Priority:	Normal	
Assignee:		
Category:	Web Services clients/XYZ	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>Hi !</p> <p>The new native XYZ tiles provider is awesome.</p> <p>But it doesn't seem to support local files. URLs like file:///mypath/{z}/{x}/{y}.png should work, but they don't load.</p> <p>The console shows</p> <p>Tile request error (Status:; Content-Type:; Length:24803; URL: file:///C:/Users/Olivier/Dropbox/Backups/UrbaSEN_Gandi/urbamonde_vps_tiles/ign_2010/17/59211/60097.jpg)</p> <p>Could it be that it just fails because the code is expecting an http status ?</p> <p>Thanks !</p>
