Category:	Vectors		
Affected QGIS version:	2.18.8	**Regression?:**	Yes
Operating System:	Ubuntu 16.04 64	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	24506

Description

Hello,

I updated QGis this morning.

When I try to add an new layer from delimited text Qgis crash when I press the Ok button.

I even tried to create a new shapefilze in Qgis, export it to csv and then try to import it again : Qgis also crashes (see file text.csv).

Il also tried to change end-line delimiters to unix and windows, without any benefit.

best regards,

JB
