

## QGIS Application - Bug report #16610

### Composer: Item Properties: expanded items resetting

2017-05-24 11:02 AM - Night yb

<b>Status:</b>	Closed	
<b>Priority:</b>	High	
<b>Assignee:</b>		
<b>Category:</b>	Map Composer/Printing	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> Yes
<b>Operating System:</b>	Win8.1	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 24510
<b>Description</b>  The <i>Item Properties</i> panel resets to the default configuration of expanded/collapsed property groups when selecting items. This is not the case in 2.18, which restores the previous state as expected.  <b>Steps to reproduce:</b>  1. -> New project 2. -> New print composer 3. add two rectangle shapes 4. select the first rectangle 5. expand the <i>Position and size</i> property subgroup in the <i>Item Properties</i> panel 6. select the second rectangle 7. select the first rectangle 8. <i>Position and size</i> is now collapsed  QGIS version: 2.99.0-Master d55fa22		

#### History

##### #1 - 2017-05-24 01:48 PM - Giovanni Manghi

- Priority changed from Normal to High

##### #2 - 2017-12-18 11:54 PM - Nyall Dawson

- Resolution set to fixed/implemented

- Status changed from Open to Closed
