

QGIS Application - Bug report #16612

QGIS crashes when adding PostGIS layers from Browser panel

2017-05-24 02:16 PM - Ross McDonald

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Browser	
Affected QGIS version:	2.18.8	Regression?: No
Operating System:	Windows 7 x64	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 24512
Description		
Using latest QGIS 2.18.8 (cde1d78) x64 version on Windows 7 x64 I can cause a crash and minidump by trying to add PostGIS layers from the Browser panel. Adding the same layers in the same way with 2.14.15 works fine.

History

#1 - 2017-05-24 02:17 PM - Giovanni Manghi

- Resolution set to fixed/implemented
- Status changed from Open to Closed

this was already fixed, wait a new build (2.18.9, probably soon), downgrade or use the classic "add postgis layer" dialog.
