QGIS Application - Bug report #16635
Add child Feature button in Relation Reference Widget (n:m-Relations)

2017-05-29 03:42 PM - Manuel K

Status:	Closed		
Priority:	High		
Assignee:	Matthias Kuhn		
Category:	Forms		
Affected QGIS version:	2.18.9	**Regression?:**	No
Operating System:	Windows 7 Pro 64 bit	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	24535

Description

When activating the Editing mode (in the main window) the "Add child Feature" button in form doesn't become active whereas the "Link existing child Features" button does.
Deactivating the Editing mode activates the "Add child Feature" button, but when clicking on it nothing happens.

Adding a child feature only works if an existing feature is selected first (after activating the Editing mode). Then all 4 buttons become active.
