

QGIS Application - Bug report #1666

continous color selects wrong attribute

2009-04-30 08:22 AM - bjpfei -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Symbology	
Affected QGIS version:		Regression?: No
Operating System:	RedHat	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11726
Description		
1.) Load a DB-Layer		
2.) Select continous color in Symbology		
3.) Select a classification field		
4.) OK		
The range for the continous color is taken out of the attribute field before the attribute field you 've chosen. This happens if the selected attribute field is behind the geometry column		
thx
