QGIS Application - Bug report #16666
New unified add button: file selector sometimes opens behind the Data Source Manager

2017-06-05 06:31 PM - shenriod -

Status:	Closed		
Priority:	Normal		
Assignee:	Alessandro Pasotti		
Category:	Browser		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	up/downstream
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	24565

Description

When using the new unified "Add data" button, it seems that the File Selector sometimes opens behind the Data Source Manager, when the user clicks on "Browse"

I cannot reproduce this on KDE/Linux. Maybe something specific to Ubuntu Unity?

I tested with modal and modeless options.

I also get the same thing on Ubuntu 17.10 (Unity desktop) but it also affects other things, not only the Data Source Manager.

If I right click on a vector layer in the Layers Panel and select **Save As...** and then **Browse** the File Selector opens in the background.

It seems like this bug is due to something else, not the Data Source Manager.
