<b>Description</b>		
<p>Hi,</p> <p>On QGIS master, QGIS will fail to retrieve passwords from a pgpass.conf file.</p> <p>This happens when expanding a db tree in Database &gt; DB Manager</p> <p>The database is added in the PostGIS data provider without a password, which can connect and load layers.</p> <p>Attached is a screenshot showing this.</p> <p>Many Thanks.</p>

## History

### #1 - 2017-06-06 11:46 AM - Giovanni Manghi

- Regression? changed from No to Yes
- Priority changed from Normal to High
- Subject changed from pgpass - Windows to pgpass do not work on qgis master

### #2 - 2017-06-06 12:25 PM - Sandro Santilli

It could make a good case to add to the new DBManager testsuite: <https://github.com/qgis/QGIS/pull/4688>

Can you tell which version was last found working ? Was 2.18 branch tested too ?

### #3 - 2017-06-06 02:11 PM - Andy Harney

- File PGPASS\_2.18.9.png added
- File PGPASS\_Master.png added

I've just tested 2.18.9. Setting up a PostGIS connection fails, as does using DB Manager.

On master, setting up a PostGIS connection works, but DB Manager fails.

I've added more images to show.

Thanks.

Giovanni as you marked this as a regression, do you know which older version worked fine ?

I overlooked the notification and assume that was something only affecting master.

Probably a duplicate of #10932 (unix style line endings (linefeed only) expected)
