QGIS Application - Bug report #16703
QGIS 3 : Node tool bug on pan

2017-06-12 01:32 PM - Arnaud Poncet-Montanges

Status:	Closed			
Priority:	High			
Assignee:				
Category:	Digitising			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:	Windows 7 x64	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	not reproducable	
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	24602	

Description

Click and pan on the node tool creates a selection rectangle which makes QGIS crash.

The user should not do this, but I did it by mistake (and old habit) so it should not make qgis crash.

#2 - 2017-06-13 02:04 PM - Giovanni Manghi

- Priority changed from Normal to High

- Crashes QGIS or corrupts data changed from No to Yes

- Assignee deleted (Regis Haubourg)

- Status changed from Open to Feedback

- Category changed from Edit widget to Digitising

just tested on the same platform on the latest master, no crash. Or maybe I have not understand how replicate so possibly attach your data and/or attach a screencast.

#3 - 2017-07-07 02:22 PM - Richard Duivenvoorde

Tested here too, both on Debian Testing and Windows7 both master version.

With shp, gpkg and memory layers tested, no crashes.

When I pan (and drag the blue box you see) I just select other points...

Please add a way/data to reproduce, or else close this issue?

#4 - 2017-07-07 02:23 PM - Giovanni Manghi

- Status changed from Feedback to Closed

- Resolution set to not reproducable

Closing for lack of feedback.

#5 - 2017-09-21 08:03 AM - Arnaud Poncet-Montanges

Can't reproduce.
