

QGIS Application - Bug report #1673

shape-file creation: attributes are clipped to 80 symbols

2009-05-01 07:14 AM - Maxim Dubinin

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:		
Affected QGIS version:		Regression?: No
Operating System: Windows		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11733
Description 1. Create new shape-file, any type, one string field 2. Start editing, create one feature and add text string longer than 80 symbols 3. Save Attribute just entered is clipped to 80 symbols. I think this a major issue, not sure if this is OGR layer support.
