<b>Description</b>		
<p>It seems that in the attribute table in QGIS master the attribute tables shows the internal code instead of the display value for fields where relation reference widgets are assigned.</p> <p>In QGIS 2.x this works as expected. In master (3.x) it is broken.</p>

- *Resolution set to worksforme*

- *Status changed from Open to Closed*

Issue doesn't appear anymore in master. Closing therefore.
