<b>Easy fix?:</b>	Yes	<b>Copied to github as #:</b> 24672
<b>Description</b>  Currently, QGIS-GDAL seems to be only able to display rasters that are stored in the database as it displays a black image for PostGIS Out-DB rasters as described in my post in the link below: <a href="http://osgeo-org.1560.x6.nabble.com/QGIS-GDAL-OUT-DB-RASTER-SUPPORT-td5318735.html">http://osgeo-org.1560.x6.nabble.com/QGIS-GDAL-OUT-DB-RASTER-SUPPORT-td5318735.html</a>  Please, I wanted to find out if there is any ongoing work towards providing GDAL support for PostGIS Out-DB rasters or any way to make QGIS display PostGIS Out-DB rasters.
