| Priority: | High | |
| Assignee: | Victor Olaya | |
| Category: | Processing/Core | |
| Affected QGIS version: | 2.18.11 | Regression?: Yes |
| Operating System: | Windows 64 bits | Easy fix?: No |
| Pull Request or Patch supplied: | No | Resolution: not reproducible |
| Crashes QGIS or corrupts data: | No | Copied to github as #: 24716 |
| Description | | |
| <p>When I try to use the "Points layer from table" tool in QGIS 2.18.10, it doesn't work if I try to save the result in a permanent file. It works if I choose to save to a temporary file. It worked as expected in QGIS 2.18.9.</p> | | |

#1 - 2017-07-09 04:35 PM - Giovanni Manghi

- Status changed from Open to Feedback

Tested on both Linux and Windows 7 and cannot confirm. Better check if you are really using the version of Processing shipped with 2.18.10 and/or attach your data.

#2 - 2017-07-25 07:44 PM - Giovanni Manghi

- Affected QGIS version changed from 2.18.10 to 2.18.11

#3 - 2017-07-25 08:24 PM - Giovanni Manghi

- Resolution set to not reproducible

- Status changed from Feedback to Closed

Closing for lack of feedback.
