

## QGIS Application - Feature request #16828

### Multi-attribute search should support embedded forms/relations

2017-07-10 01:00 PM - Andreas Neumann

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>	Matthias Kuhn	
<b>Category:</b>	Forms	
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> fixed/implemented
<b>Easy fix?:</b>	No	<b>Copied to github as #:</b> 24727
<b>Description</b>		
<p>Multi-attribute search (Ctrl-F) only support search/filters in one table.</p> <p>It would be very useful to also support filters in related/nested sub-forms.</p> <p>E.g. for two tables, table A (countries) and table B (cities) which have a common key (e.g. the country code), one should be able to filter countries that have relations to cities with more than 2 million population.</p>		

#### History

##### #1 - 2017-10-23 11:11 AM - Andreas Neumann

- Assignee set to Matthias Kuhn

##### #2 - 2019-03-28 11:56 AM - Andreas Neumann

- Resolution set to fixed/implemented

- Status changed from Open to Closed

Is implemented in recent QGIS versions.
