QGIS Application - Bug report #16849
focusing on label item in composer high CPU and properties dock size changing constantly

2017-07-11 03:25 PM - Regis Haubourg

Status:	Closed		
Priority:	High		
Assignee:			
Category:	Map Composer/Printing		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	24748

Description

Hi, strange issue, just create a simple item with text in a composer,

and its "item" properties dialog width keep getting larger, and CPU consumption raising.

Unfocusing stops this, refocusing triggers it again.

Fix infinitely growing widgets

Fixes #16849

History

#1 - 2017-07-11 03:27 PM - Giovanni Manghi

- Status changed from Open to Feedback

Hi Regis, if is not a regression or does not causes a crash or data corruption we should tag this with "normal" priority. Agree?

#2 - 2017-07-11 03:45 PM - Regis Haubourg

- Crashes QGIS or corrupts data changed from No to Yes

Well, I could have flagged a crash yes, because I think the infinite loop will end this way if you wait long enough :)

Regis -

possible suspects here are commit:eb8f91a55677b2e9118210871ab27ca847364ec2, commit:0802586a13e5f21238daf223d5d5d754bce23c7f and commit:0b9fb5d6e199e4a52820b4d74a392196f459cad5

Can you checkout the commits just before each of these and see if you can narrow this issue down to one of those?

#4 - 2017-07-27 03:47 PM - Giovanni Manghi

Hi Regis! were you able to test Nyall suggestion?
