

QGIS Application - Bug report #1689
old projects: selecting `Project Properties...` ('P') in `Settings` menu crashes QGIS

2009-05-13 01:36 AM - thokus -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Projection Support	
Affected QGIS version:		Regression?: No
Operating System:	Linux	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11749
Description		
Opening the Settings menu Project Properties... (pressing 'P') in QGIS project files created with older versions causes QGIS 1.1.0 to crash. Purging whole project file from loaded layers, checking KBS settings and reloading layers again helped to solve problem once. Second try with other project failed instead.		

History

#1 - 2009-07-10 12:55 AM - Giovanni Manghi

I cannot replicate the problem with qgis 1.2 from trunk and Ubuntu 9.04. Please give it a try with the latest version and report back.

#2 - 2009-07-10 01:23 AM - Horst Düster

This issue was fixed by Marco in trunk. I believe you can close this ticket.

#3 - 2009-07-10 01:25 AM - Giovanni Manghi

- Resolution set to fixed
- Status changed from Open to Closed

So I'm closing this ticket, reopen it if necessary.

#4 - 2009-07-10 02:13 AM - Jürgen Fischer

Replying to [comment:3 lutra]:

So I'm closing this ticket, reopen it if necessary.

fixed in commit:2cd587c4 (SVN r10854) and commit:ebba6f7f (SVN r10877)
