# QGIS Application - Bug report #16903

# Relation reference widget not filtering available values when "Chain filters" option is activated

2017-07-21 10:47 AM - Paul Blottiere

Status:ClosedPriority:NormalAssignee:Paul Blottiere

Category: Edit widget

Affected QGIS version:masterRegression?:NoOperating System:Easy fix?:No

Pull Request or Patch supplied: Resolution:

Crashes QGIS or corruptes data: Copied to github as #: 24802

#### Description

When the "Chain filter" option is activated, filtering combobox should only propose values for which a feature well exists.

However, it's not the case because previous filtering values are not taking into account. Thus, sometime, users are able to select values whereas there's no existing feature(s) corresponding to the filter.

See the initial description/discussion here: https://github.com/qwat/QWAT/issues/186
