| Description | | |
| Calculating PERIMETER and AREA from [[PostGIS]] Layers by using fTools->Geometry Tools->Export/Add geometry columns doesn't work correct with [[PostGIS]] Layers, the AREA column is missing. With shape layers everything works fine. | | |

Hi,

I can correctly calculate area and perimeter of features in a postgis layer with ftools. Please give it a try again with the latest version of the plugin and report back.

#2 - 2009-07-16 01:02 AM - Giovanni Manghi

- Resolution set to worksforme

- Status changed from Open to Closed
