QGIS Application - Feature request #16959
Allow to toggle Symbol layer types on and off

2017-08-02 10:22 PM - Johannes Kroeger

Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	24858

Description

When developing more complex styles you sometimes want to see the single layers of the style independently. It would be great if the symbol layers had checkboxes to toggle them on and off (like eg map layers do).

- Status changed from Open to Closed

It's possible in master (3.0). There's a checkbox at the bottom of the symbol layer properties widget which allows the symbol layer to be disabled.

#5 - 2018-03-27 08:43 PM - Johannes Kroeger

That is very hidden and not suited for a quick-iteration workflow. Any chance of having it look and work like the canvas' layer toggling as in my mockup?
