

QGIS Application - Feature request #16960

Allow blending modes between multiple Symbol layers

2017-08-02 10:34 PM - Johannes Kroeger

Status:	Open	Resolution: Copied to github as #: 24859
Priority:	Normal	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
<p>While blending between layers is awesome already, for more complex styles it would be helpful to be able to use blending modes between the Symbol layers of a single style.</p> <p>My use case would be using a shapeburst fill as gradual mask for a raster image fill.</p>
