QGIS Application - Bug report #16973
Help viewer stores defaults in a wrong path

2017-08-05 12:23 PM - Jorge Rocha

Status:	Closed		
Priority:	Low		
Assignee:	Jorge Rocha		
Category:	PyQGIS Console		
Affected QGIS version:	master	**Regression?:**	No
Operating System:	Ubuntu	**Easy fix?:**	Yes
Pull Request or Patch supplied:	Yes	**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	24872

Description

Help viewer (called from Python console) is a different process/executable called from QGIS.

The settings are being read and write from a wrong path.

The path now is: (on Ubuntu)

    /home/jgr/.local/share/qgis_help/profiles/default/QGIS/QGIS3.ini

The path should be:

    /home/jgr/.local/share/QGIS/QGIS3/profiles/default/QGIS/QGIS3.ini

To reproduce this bug, just launch Python console, open the Help dialog, move it and close it. The QGIS3.ini file is created in the wrong folder.

A new PR is under way to fix this.
