

QGIS Application - Bug report #16986

a new bookmark is apparently not created after the first one, if only QGIS bookmarks are present

| Description If there are existing QGIS bookmarks a new one is apparently not created; it does not show in the bookmarks panel with the name field in edit mode for giving it a name. A new bookmark is created in tbl_bookmarks. You can create a new bookmark when there aren't any existing, as on a fresh installation of QGIS. Additionally, you can add a new bookmark when there are project bookmarks, but a project bookmark will seem to disappear from the list as it appears overwritten by the new bookmark. This is a regression from 2.18. I am using OSGeo4W nightly build on Windows 8.1 64-bit system. | | |
