QGIS Application - Bug report #17003
Spatial bookmarks keyboard navigation: right-arrow causes a row to appear below the current one and looks like a tree expansion

2017-08-10 06:31 PM - Steven Mizuno

Status:	Closed			
Priority:	High			
Assignee:	Alessandro Pasotti			
Category:	GUI			
Affected QGIS version:	2.18.11	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	Yes	**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	24902	

Description

This occurs when there are project bookmarks in addition to QGIS bookmarks.

The newly showing row contains the data of row 1. Left-arrow collapses this row.

If the current row is the newly showing row (down-arrow from the one you started on) and right-arrow again, QGIS crashes.

Also, the asterisk key (for expanding all) will crash QGIS. If there are presently only QGIS bookmarks nothing happens, but as soon as a project that has bookmarks is loaded QGIS crashes.

2.18 has the same behavior.

I am using OSGeo4W nightly build on Windows 8.1 64-bit system.
