

QGIS Application - Bug report #17004

Spatial bookmarks: SRID value should not be set to 0 when moving a bookmark to/from a project

2017-08-10 06:39 PM - Steven Mizuno

Status:	Closed		
Priority:	Normal		
Assignee:	Alessandro Pasotti		
Category:	GUI		
Affected QGIS version:	2.18.11		
Operating System:	unspecified		
Pull Request or Patch supplied:	No		
Crashes QGIS or corrupts data:	No	Regression?:	No
		Easy fix?:	No
		Resolution:	fixed/implemented
		Copied to github as #:	24903
Description			
<p>This is a problem when this bookmark is used with a project that has a different CRS from it. The extent values are used as is, but the SRID is lost, so the bookmark zooms to an unexpected area.</p> <p>Note that you can change a bookmark's SRID. This will fix the bookmark so it zooms to the expected area.</p> <p>2.18 has the same behavior.</p> <p>I am using OSGeo4W nightly build on Windows 8.1 64-bit system.</p>

- Affected QGIS version changed from master to 2.18.11

I should have indicated version 2.18 rather than master, and that I believe master has the same behavior as a project bookmark's SRID becomes 0, but can't fully test due to a bug in moving bookmarks.

Further information: I believe the SRID value isn't being copied from the bookmarks list because the <SRID> element that should be in the project file isn't present, so a 0 value results when the element is read. The <SRID> element is present after changing the SRID value in the bookmarks list.

that is ok. If an issue is affecting both 2.18 (the actual LTR) and master this should be tagged for 2.18. When qgis 3(.2) will become the new LTR then I guess we will need to move all the open issues (still affecting 3) from 2.18 to 3.2.
