Pull Request or Patch supplied:	No	**Resolution:**	worksforme
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	24919

Description

The 64 bits version of QGIS 2.18 does not uninstall properly. Intall information is not removed from Windows registry. Example of consequence : It is not possible to reinstall QGIS 2.18 to another directory because even after uninstalling it and running the install again this message appear : "QGIS is already installed to your computer, click ok to reinstall or cancel"
