

QGIS Application - Feature request #17032

delete (or propose to) all files of a shapefile with browser

2017-08-18 11:52 AM - Loïc BARTOLETTI

Status:	Closed	Resolution: Copied to github as #: 24931
Priority:	Normal	
Assignee:		
Category:	Browser	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
Hello,		
When you delete a shapefile in browser not all files are removed: .cpg stay (an optional file to .dbf) .idx (an alternative index from AutoCad Map and other)		
It would be nice to have a list of the files remaining with the same name (and to be able to delete them by selecting them if you wish)

I think this is an upstream OGR/GDAL bug: I'm using GDAL/OGR API to delete the layers.

See: <https://github.com/qgis/QGIS/blob/master/src/providers/ogr/qgsogrprovider.cpp#L4331>

OK, I understand that is not a problem with QGIS but with GDAL/OGR API, and so it's not a bug but for an end user, the folder it's not cleaned.

So, what about to have a feature to answer some (maybe bad...) usages? I have exposed a simple case, but also you can have user which using the same name of a layer and want also remove (or rename) it like a .pdf or .txt...

Thanks.

Why reopened? If there is a good reason this should be left here, and the resolution field changed.

#6 - 2017-08-24 08:36 AM - Loïc BARTOLETTI

Sorry, I did not see that my message was not added, my bad.

I reopened the subject because I posted a message after its closure and I think that even if it is not a bug of QGis, the users can hope for a "complete" cleaning of files (it is the same thing for a renaming). It would be nice to indicate to the user that files having the same name were not deleted and to propose its deletion (the same for renaming).

If you prefer, we change a bug report to a feature request.

#7 - 2017-08-24 11:35 AM - Giovanni Manghi

- Status changed from Feedback to Open

- Tracker changed from Bug report to Feature request

- Subject changed from delete shapefile in browser to delete (or propose to) all files of a shapefile with browser

- Resolution deleted (up/downstream)

#8 - 2018-04-04 10:26 AM - Frank Sokolic

.qpj files are not deleted either. Deleting these files could also be part of the feature request.
