Status:	Closed	
Priority:	Low	
Assignee:		
Category:	Labelling	
Affected QGIS version:	master	Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed
Crashes QGIS or corrupts data:	No	Copied to github as #: 11764
Description 1.) open Layer Properties 2.) select labels 3.) mark display labels and select the field you like 4.) select buffer 5.) mark buffer labels 6.) select a buffer size and a buffer color 7.) If you now mark "size is in map units" there is no differencet to size in points. Seems that the size is always in points

"New labeling" doesn't offer map units for the buffer at all. Is there a specific use case for it?

this feature is now added in qgis master and works fine. Old labelling will be dropped anyway.
