Pull Request or Patch supplied:	No	**Resolution:**		
Easy fix?:	No	**Copied to github as #:**	24943	

Description

QGIS > Map Composer > Export as image > *.TIF
QGIS > Map Composer > Export as PDF > *.PDF

It would be nice to set e.g. compression type of my exported map to TIF or PNG, or set compression level when saving to JPG, or more settings for PDF export (namely handling fonts, text to curves, compression and/or downsampling for bitmaps, etc.)
Already discussed on forums:
