

QGIS Application - Feature request #17054
importing/exporting to sld should use a rotation by field value if available

2017-08-24 10:31 AM - Paul van Genuchten

Status:	Open	Resolution: Copied to github as #: 24953
Priority:	Normal	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>In qgis you can set a rotation for a symbol based on a attribute value (see screenshot).</p> <p>This dynamic rotation is not exported to or imported from an SLD</p> <p>I haven't checked but the same issue probably exists for setting symbol size based on an attribute value</p>

Hi Paul, no attribute based symbology, of any kind, is supported in import/export. We have been looking for funding to support it, so far in vain :-)

#2 - 2017-10-14 11:06 AM - Andrea Aime

Also, this seems to be a (tiny) subset of larger ticket #15430
