Pull Request or Patch Supplied:	Yes	Resolution: fixed/implemented
Easy fix?:	Yes	Copied to github as #: 24991
Description I have found Statistics by categories to be very useful. One of my use cases is to get a count of features grouped by attribute, and this is currently not possible if there are no numerical attributes. A very useful enhancement would be to make the Field to calculate statistics on optional. Pull request: https://github.com/qgis/QGIS/pull/5095 In the pull request Field to calculate statistics on is made optional and values are set to 0 if no field is specified. This results in a table with 0 or nan values in all the statistics columns except for count .
