<b>Description</b>		
<p>I use the latest version of QGIS 2.18.12 on Windows 7.</p> <p>From a Spatialite layer of 85218 entities, I made a virtual layer of 714 entities.</p> <p>When I view it or when I open the attribute table for this virtual layer no problem the same when I identify entities.</p> <p>When I make a selection with a rectangle I find in the attributes table the selected entities.</p> <p>But if from the attribute table I make a copy from the menu bar and then Edit-&gt; Paste entities as a temporary layer this one does not contain at all the selected entities</p> <p>The problem occurs only with virtual layer</p> <p>Same problem as Bug report # 14736</p>
