QGIS Application - Bug report #17110
Loading any CSV causing crash

2017-09-06 03:22 PM - Thomas Kane

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Data Provider/Delimited Text			
Affected QGIS version:	2.18.0	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	not reproducable	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	25009	

Description

When loading a CSV file using the 'create a layer from delimited text file' option I can load the file fine and
select easting/northing etc but when I okay it there is an error message and the QGIS shuts itself down. I have
got a few colleagues to try loading different CSV files but getting the same result.

Thanks

- Status changed from Open to Feedback

Please attach the CSV. Also try on recent release (2.18.12).

#2 - 2017-09-22 02:06 PM - Giovanni Manghi

- Resolution set to not reproducable

- Status changed from Feedback to Closed

Closing for lack of feedback.
