QGIS Application - Bug report #17114
loading NetCDF files causing crash

2017-09-08 12:21 PM - Harmen Kampinga

Status:	Closed			
Priority:	High			
Assignee:				
Category:	Vectors			
Affected QGIS version:	2.18.12		**Regression?:**	No
Operating System:	Windows		**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	no timely feedback
Crashes QGIS or corrupts data:	Yes		**Copied to github as #:**	25013

Description

Loading several NetCDF files causing QGIS crashes on my system

- Windows 10 Pro
- 64 bits system
- QGIS 2.18.12
- data: https://data.knmi.nl/datasets

Also using the Plugin NetCDFBrowser doesn't work.

History

#1 - 2017-09-08 12:26 PM - Giovanni Manghi

- Status changed from Open to Feedback

works fine here on Linux.

#2 - 2017-09-08 01:00 PM - Giovanni Manghi

- Operating System set to Windows

- Priority changed from Normal to High

- Status changed from Feedback to Open

Crash confirmed under Windows.

#3 - 2017-09-08 01:47 PM - Harmen Kampinga

works fine on Linux: confirmed by KNMI

#4 - 2019-01-21 12:34 AM - Jürgen Fischer

- Status changed from Open to Feedback

Please test with QGIS 3.4 - QGIS 2.18 reached it's end of life.

#5 - 2019-02-11 12:25 AM - Nyall Dawson

- Resolution set to no timely feedback

- Status changed from Feedback to Closed
