QGIS Application - Bug report #17137
Parsing some Certificate Authorities causes crash

2017-09-14 01:02 AM - Larry Shaffer

Status:	Closed			
Priority:	High			
Assignee:				
Category:	Authentication system			
Affected QGIS version:	master	**Regression?:**	Yes
Operating System:	macOS 10.11.6	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	no timely feedback
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	25036

Description

When parsing some CAs, e.g. when double-clicking for opening Cert Info dialog, immediately causes QGIS to crash with report (see attached).

Appears to be either a problem with too-new certs to be read by QCA, or the QCA code under Qt5 has a bug that did not present under Qt4.

History

#1 - 2017-09-14 01:04 AM - Larry Shaffer

- File qgis-issue_17137.txt added

#2 - 2017-09-20 02:24 AM - Larry Shaffer

This happens when the cert's public key algorithm is based upon elliptic curve.

#3 - 2018-02-22 07:43 PM - Giovanni Manghi

- Priority changed from Normal to High

#4 - 2018-09-05 07:06 PM - Denis Rouzaud

- Subject changed from Parsing some Certificate Authorities on macOS causes crash to Parsing some Certificate Authorities causes crash

#5 - 2018-09-18 09:42 AM - Jürgen Fischer

- Assignee deleted (Larry Shaffer)

#6 - 2018-11-08 01:28 PM - Giovanni Manghi

- Status changed from Open to Feedback

Please try on QGIS 3.4.1, if the issue is still valid change the affected version, thanks.

#7 - 2018-12-27 11:13 AM - Nyall Dawson

- Status changed from Feedback to Closed

Closed due to lack of feedback

#8 - 2018-12-28 03:09 PM - Giovanni Manghi

- Resolution set to no timely feedback
