

QGIS Application - Bug report #17139

QGIS 2.18.4 Crash on resizing Polygons

2017-09-14 10:55 AM - Alexander Nicolay

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Editing	
Affected QGIS version:	2.18.4	Regression?: No
Operating System:	Windows 7 Professional	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: worksforme
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 25038
Description		
<p>Trying to resize a Polygon ends up with a crash of QGIS directly after selecting the polygon. After several restarts of qgis and saving the polygon shapefile to a new file it works sometimes.</p> <p>However, ist very frustrating, becaus i have no idea why this happens. The dump file created by QGIS has a size of 30 mb, so i can' upload the fil. What should i do.</p>		

History

#1 - 2017-09-14 11:02 AM - Giovanni Manghi

- Priority changed from Normal to High
- Status changed from Open to Feedback

Please attach the offending data and precise steps on how replicate.

Also try to:

- upgrade to a more recent version (2.18.12)
- disable/remove all the 3rd party plugins, then restart qgis and try again

#2 - 2018-02-22 02:43 PM - Giovanni Manghi

- Resolution set to worksforme
- Status changed from Feedback to Closed

Closing for lack of feedback, please reopen if necessary.
