Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:		**Copied to github as #:**	25041

Description

This was observed on master with ones of the GPKG samples:

http://www.geopackage.org/data/gdal_sample_v1.2_spi_nonlinear_webp_elevation.gpkg

Possibly affecting also other datasources.

The error message is in the attached images as is not possible to copy it from DB Manager message bar, the QGIS log shows an empty message.

Hi Alessandro, I can only test on Windows this days. I just updated to 01468d0879 and still see it. Maybe this revision has not all the latest fixes?

If that's only on windows that's expected: gpkg raster support in GDAL 2.2.1 is broken on windows: you'll need at least GDAL 2.2.2RC1
