QGIS Application - Bug report #17154 Sub layer show/lock isn't affected changing parent layer

2017-09-17 09:21 PM - Carlo Folini

Status: Closed Priority: Normal

Assignee:

Category: Editing
Affected QGIS version:2.18.12

Affected QGIS version: 2.18.12

Operating System: windows

Pull Request or Patch shapplied:

Crashes QGIS or corrupts data:

Regression?: No

Resolution: invalid

Copied to github as #: 25053

Description

In layers tab when I change the show/lock on parent layer, sub layers aren't affected.

The expected behaviour should be that parent layer changes are applied to child layers.
