<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 25092
<b>Description</b>  I am using QGIS 2.18.12 (64 Bit) and QGIS 2.14.11 (32 Bit) on a Windows 10 computer.  When I clear a filter - "Provider feature filter" (Layer Properties>General>Provider feature filter) from a shapefile, I am unable to edit that shapefile until I have closed the project and reopened it.  I have checked and this behaviour is the same on both the 32bit and 64bit versions of QGIS that I use
