

QGIS Application - Feature request #1720

Add CRS choice button in "Add delimited text" plugin.

2009-06-03 03:03 AM - marish -

Status:	Closed	
Priority:	Low	
Assignee:		
Category:	Data Provider/Delimited Text	
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Easy fix?:	No	Copied to github as #: 11780
Description It would be nice to provide CRS choice dialog button in "Add delimited text" plugin for imported data. Setting correct CRS for delimited text layer requires extra steps (Layer->Properties->CRS) and novice users may not notice usage of wrong CRS with resulting problems.

- Resolution set to fixed/implemented
- Status changed from Open to Closed
- % Done changed from 0 to 100

Hello, bug triage...

on QGIS 2.13 (and perhaps on previous versions), when you use the delimited text data provider you are asked the CRS once you have set all the CSV options and clicked button (it is the final step before opening the layer in the canvas).

I am closing this feature request...
