

QGIS Application - Feature request #17217

Create an empty Geopackage DB

2017-09-28 05:36 PM - shenriod -

Status:	Open	Resolution: Copied to github as #: 25116
Priority:	Normal	
Assignee:		
Category:	Browser	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>Currently it is not possible to create an empty Geopackage DB. One can only create a new layer in a (new or existing) Geopackage DB. There are cases where I don't want to create a new layer. I only want to create an empty Geopackage, so that I can later, e.g., import a bunch of shapefiles into it.</p> <p>Of course, I can create a geopackage layer and delete it later, but this is not super intuitive for the users</p> <p>Discussion here: https://lists.osgeo.org/pipermail/qgis-user/2017-September/040774.html</p> <p>General call for features reparding support of Geopackage: https://docs.google.com/document/d/1xp36eR0DYThpTCNsWUam5JhFKVjOVpmRObwWSPjkrbc/edit#</p>
