

QGIS Application - Bug report #17230

QGIS Crash after cutting features

2017-10-02 03:04 PM - Vida Krstulovic

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Editing	
Affected QGIS version:	2.14.18	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 25129
Description		
<p>Hi!</p> <p>I have an issue with my qgis 2.14... I have a point layer I have converted to line layer using Point2One PlugIn, and after the conversion, which is good, I wanted to cut features, since I wanted to delete line connecting two tracks in shape file. And it crashed..</p> <p>Qgis is now telling me that Point2One PlugIn will be blocked until it is reported..</p>

Try:

with qgis 2.18
removing any 3rd party plugin

Also:

attach the data
is the editing tool that causes the crash a core one or one from a 3rd party plugin?

#2 - 2017-10-02 03:16 PM - Vida Krstulovic

Will try to do those two things..

with qgis 2.18
removing any 3rd party plugin

Also:

attach the data --> I can't attach the file since it is part of my job, and I'm not allowed to share it. Sorry.. :)

is the editing tool that causes the crash a core one or one from a 3rd party plugin?

:) :) :) I will say core one.. but, please use it with a reserve.. Since it crashes every time I click on split features.

I have also tried to create a new shape file from the one Point2One created. Again the same problem. It crashes every time I use split features, in editing mode of the shape file.

try the above:

latest 2.18

no 3rd party plugins (you can backup and remove the .qgis2, is even better)

OK. Will do that now, and give feedback here what has happened.

Thank you a lot!!
