

QGIS Application - Bug report #17242

QGIS 3 is storing cache in windows roaming profile?

2017-10-04 08:46 AM - Arnaud Poncet-Montanges

Status:	Closed	
Priority:	Normal	
Assignee:	Arnaud Poncet-Montanges	
Category:	Unknown	
Affected QGIS version:	master	Regression?: No
Operating System:	Windows 7 x64	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 25140
Description		
<p>I've noticed some problems due to my windows roaming profile size recently.</p> <p>It's not only QGIS 3 fault but I would avoid as much as possible to store too much data there.</p>

I agree that this a big problem for Windows users with roaming profiles (such as most gov organizations, companies, etc.)

Storing many MB of cache content in the roaming profile slows logging into Windows a lot and ultimately such users will get complaints from their IT department.

On my side, I usually set a low cache size value in the settings to avoid this but that's true that cache should be in the local profile only.

- Status changed from Open to Feedback

Please check if this issue is still valid on QGIS 3.4.5 or 3.6.

#5 - 2019-03-13 10:48 AM - Arnaud Poncet-Montanges

- File cache_roaming.png added

Seems to be fine.

C:\Users\user\AppData\Roaming\QGIS\QGIS3\profiles\default\cache
