

QGIS Application - Bug report #17246

When snapping with the node tool (within the same layer or to other layers) the fuchsia "x" symbol is not shown

2017-10-04 02:59 PM - Giovanni Manghi

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Digitising	
Affected QGIS version:	2.18.13	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed/implemented
Crashes QGIS or corrupts data:		Copied to github as #: 25144
Description		
<p>Anyway snapping works. When using the tool to add new feature and doing snapping the "x" fuchsia symbol shows as expected.</p> <p>This seems to not affect master. Not sure is a regression (tested on 2.18.13 and 2.14.19).</p>

Please test with QGIS 3.4 - QGIS 2.18 reached it's end of life.

#2 - 2019-02-23 01:04 PM - Alessandro Cristofori

- File *snapping_test.png* added

On Version 3.4.4 tried Snapping on Vertex and Segment together, on Vertex alone and Segment alone.

The fuchsia notation appears when clicking on the vertex to snap and the snapping works in all three cases above (see example image).

When clicking on a segment to start snapping and try to snap to another vertex or segment, then the fuchsia symbol does not appear and snapping does not happen. But I imagine this is the default behaviour as I believe it is not possible to trace an entire segment to the other with snapping.

Bug seems to be resolved but better check the above condition.

#3 - 2019-02-23 10:47 PM - Giovanni Manghi

- Resolution set to fixed/implemented

- Status changed from Feedback to Closed
