<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 25154
<b>Description</b>  When loading a SpatiaLite layer with the SpatiaLite provider, QGIS doesn't load the layer's default style. Loading with the OGR provider works fine.  It doesn't matter if the default style is saved in the source db or in the local qgis.qmldb It doesn't matter if you use the "Add xxx Layer" dialog or the appropriate branch in the Browser panel. Just the provider matters.
