QGIS Application - Bug report #17323
Random extract within subset not working

2017-10-23 02:58 PM - matteo ghetta

Status:	Closed		
Priority:	Normal		
Assignee:	Victor Olaya		
Category:	Processing/QGIS		
Affected QGIS version:	2.18.13	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	up/downstream
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	25221

Description

The algorithm in Processing "Random extract within subset" is not working. Seems stopping at the first feature found.

History

#1 - 2017-10-24 11:33 AM - Giovanni Manghi

Also does not work on 2.14 but works on master.

#2 - 2018-02-24 03:16 PM - matteo ghetta

Also 2.18.14 seems affected. No errors anymore, but only the first subset is taken into account.

#3 - 2018-02-24 05:38 PM - Giovanni Manghi

- *Resolution set to up/downstream*
- *Operating System deleted (linux)*
- *Status changed from Open to Closed*

Tried both QGIS 3 and 2.18.16 on Windows and Linux. Works ok. Please try again on 2.18.16 and report back.
