Can you post an URL?

the same works fine on 2.18?

I don't think this is related to ArcGIS map server.

Pretty much all service connections currently crash, when adding a new connection: WMS, WFS, Postgis - probably also WCS.

There is some bad bug in the combined "Add Map Layer" function (or elsewhere according to Alessandro) - see also #17279-6

Pretty much certain that this is the same cause.

Can you please check if this issue has been solved with latest commits on master?
