QGIS Application - Feature request #17336
Assume WGS84 when pasting GeoJSON

2017-10-26 02:27 PM - Johannes Kroeger

Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	25233

Description

Following the GeoJSON RFC 7946's WGS 84 implication, OGR loads GeoJSON without specified CRS as WGS 84.

Please do the same for pasted GeoJSON (Edit -> Paste Features) instead of asking once and then again for each layer.

Check you qgis general settings in the "CRS" tab: how is configured in the section "CRS for new layers"?

#2 - 2017-10-26 02:51 PM - Johannes Kroeger

- Status changed from Feedback to Open

That is set to a UTM zone for me but it is not relevant to this. GeoJSON is standardised to WGS 84 nowadays. The setting for new layers the user will *create* is something different.
