

QGIS Application - Bug report #17347

MetaSearch: Add WMS/WMTS data button broken

2017-10-28 09:58 AM - Richard Duivenvoorde

Status:	Closed	
Priority:	Normal	
Assignee:	Alessandro Pasotti	
Category:	MetaSearch Catalogue Client	
Affected QGIS version:	master	Regression?: No
Operating System:	Ubuntu 16.04 LTS	Easy fix?: Yes
Pull Request or Patch applied:	Yes	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 25244
Description		
<p>In MetaSearch the Add Data button is broken.</p> <p>To reproduce:</p> <ul style="list-style-type: none">- add Default servers- select Netherlands: National CSW- search for Nieuwegein- select first result 'Adressen Nieuwegein'- try to add the data to the map via Add Data button/Add WMS/WMTS <p>AttributeError: 'QDialog' object has no attribute 'on_btnConnect_clicked'</p> <p>Traceback (most recent call last):</p> <pre>File "/home/richard/bin/qgis_all/master/debug/share/qgis/python/plugins/MetaSearch/dialogs/maindialog.py", line 792, in add_to_ows getattr(ows_provider, connect)()</pre> <p>AttributeError: 'QDialog' object has no attribute 'on_btnConnect_clicked'</p> <p>Has probably to do with the changes in the WMS dialog's to become part of the Data Source Manager dialog? I know the connection between MetaSearch and ows services was a little fragile...</p>

History

#1 - 2017-11-07 03:19 PM - Tom Kralidis

Looks like this part of the code needs updating based on the provider changes in master:

<https://github.com/qgis/QGIS/blob/master/python/plugins/MetaSearch/dialogs/maindialog.py#L759-L792>

The basic workflow is:

- add OWS URL from MetaSearch to QGIS connections
- open given provider (WMS/WMTS, WFS, WCS, etc.) connecting to the OWS URL from the QGIS connection combo (referenced by index)

#2 - 2017-11-13 04:58 PM - Alessandro Pasotti

The 'on_btnConnect_clicked' slot has been renamed to 'btnConnect_clicked'

#3 - 2017-11-13 05:03 PM - Tom Kralidis

Changed (locally) with erroneous results per [1].

#4 - 2017-11-13 05:29 PM - Tom Kralidis

Here is a standalone example workflow: <https://gist.github.com/tomkralidis/dccb49efa760a585be38ee0c3188b8b3>

when calling btnConnect_clicked, clicking ANY of the 'Ok', 'Close', or 'Add' buttons in the 'Add Layer(s) from a WMS Server' widget adds the layer. I'm not sure why 'Ok', or 'Close' would have the same behaviour as 'Add' when calling from Python

- *File failingWFS.png added*

Heard a special Request from Mr Pasotti :-)

Failing WFS too...

Again: select Netherlands National CSW

Search for 'gemeenten' = dutch municipalities

Select dataset 'Grenzen van alle Nederlandse gemeenten' (Borders of all dutch municipalities)

Select Add Data / Add WFS: Bingo (see screenshot)

- Status changed from Open to In Progress

#9 - 2017-11-17 07:12 PM - Anonymous

- Status changed from In Progress to Closed
- % Done changed from 0 to 100

Applied in changeset commit:qgis|1b79177bc95be0afdb3369fd3befa2747e5d5963.

#10 - 2017-11-17 10:27 PM - Tom Kralidis

Added fixes for Esri services. WCS continues to work accordingly.

#11 - 2017-11-18 11:48 AM - Richard Duivenvoorde

Tested and working again \o/
Thanks people!
